Reporting	Manager - QA
QE @ Vizury	<p>Our QE's test code at the user level as well as system level, both manually and with automated tools, uses a variety of black box and white box testing techniques. They are able to understand software internals, debug problems using log files, and automate repetitive tasks using our test automation frameworks. Our QAE's work directly with our Software Development Engineers to understand features and technical implementation, as well as working with Product Managers. They understand impact of new changes on the systems as well as end user and develop test plans and test suites that approximate real-world environments and use cases. They create and execute appropriate regression tests. Our QE's are also responsible for driving our software development process toward quality-centric methodologies.</p>
Minimum Qualifications	<ul style="list-style-type: none"> ● B.E/B-Tech Degree in Computer science, Information technology from reputed institution. ● 3 - 5 years of hands-on experience on testing highly scalable web applications and backend systems ● Excellent white box and backend testing skills ● Strong analytical and problem solving skills
Core Competencies	<ul style="list-style-type: none"> ● 3+ years of experience in Software Quality Engineering with focus on testing backend servers, system components and web applications ● Should be a white box testing expert ● Should have strong ability to understand the System Under Test. ● Should have hands-on experience on System testing, and End-To-End Testing. ● Should have the ability to analyze and decompose large system into smaller individual components, and design a strategy to test this system. ● Should have strong passion for Quality, and should be driven by a set of good Quality Engineering Principles, and evangelize them. ● Should have hands-on experience on Linux, and shell scripting. ● Should have excellent debugging and troubleshooting skills. ● Should not feel satiated without delving deep into system/application level logs for

	<p>validation.</p> <ul style="list-style-type: none">• Strong analytical and problem solving skills
